# cryptech. SOLUTIONS
+ PALLETIZED SHIPMENTS

☑ PREPPING YOUR PALLET

To best protect goods while in transit:

- Put miners in original or other individual boxes on pallets & stack with heavier boxes on the bottom

- If you cannot individually box, tightly position goods side by side (no gaps) and place cardboard between each level as you stack

- No boxes/goods are hanging over pallet edge

☑ SECURING THE PALLET

- Shrink-wrap around all boxes/goods on pallet 5 to 10 times to avoid separation from pallet

- We **require** that your goods are strapped/secured directly to the pallet (see image above)

This helps prevent sliding and damage during transit but also provides supporting evidence in the rare case that we need to file an insurance claim.

☑ PICK UP INSTRUCTIONS

- As soon as funds have been received, we will book a truck for the transport and provide an ETA

- Please place labels on pallets and have BOL printed for driver

- Upon pick-up, please take a photo of goods loaded on truck as well as a photo of the signed BOL and send to the Cryptech Team

☑ PROVIDING DETAILS

Please provide the following details to help us get an accurate quote and book appropriate transport:

- Number of pallets
- Exact dimensions & weight of each pallet
- Pick-up hours
- Any lift-gate or other special requirements
- Photos of palletized goods

☑ NOTES FOR FINAL DESTINATION: RECEIVING DELIVERY

- Inspect for any damage upon arrival, while the driver is still on-site
- If damage has occurred – please make sure to note it in writing with the carrier on the BOL. (including damage description and how many boxes per pallet)
- Photograph all damage and notify us immediately via email. Include photos of damaged goods as well as written report of damage provided to driver
- Please attempt to run machines (if deemed safe to do so) to determine if visual damaged effected functionality
